DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Under current Interim Guidelines with respect to 35 U.S.C. 101, claims 1-11 define non-statutory processes because it merely manipulates a signal via a mathematical algorithm without a claimed limitation to a practical application, and the transmission of the signal, as disclosed, can be a carrier wave, and hence is non-statutory. Claims 1-5,7,11 pertain to a method/device pertaining to a mathematical calculation (adjusting the phase jitter of a signal) without limit to a practical application of an abstract idea that produces a useful, concrete, tangible result. Claim 6,8 also includes the transmission medium to be a carrier wave, and hence is also non-statutory. Claims 9,10 pertains to a signal, including mathematical processes, without limit to a practical application that produces a useful, concrete, and tangible result, and hence is non-statutory.

Allowable Subject Matter

3. Claims 1-11 are allowed over the prior art of record.

4. The following is an examiner's statement of allowable subject matter:

As per the independent claims, the claim recitations pertaining to the transmission of phase jitter parameters, along with the other elements as claimed, is not explicitly taught by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
